

CLINTON COUNTY HIGHWAY ROAD ACCESS PERMIT

There is no fee for the installation of a culvert (drive-way) pipe, except for the actual cost of the culvert pipe, minimum size of which is 30'X8", or larger, as determined by the Clinton County Highway Department. When size is determined, property owner will pay the Highway Department cost of the pipe and Clinton County Highway will install culvert pipe using its own equipment, manpower and resources.

If the property owner fails to pay the Clinton County Highway Department for the cost of the determined culvert pipe within 30 days of permit application approval, then the Clinton County Highway Department will install said pipe and the property owner will be billed for the actual cost of the pipe, stone and hourly costs of men and equipment to install culvert pipe unless prior arrangements are made with the Clinton County Highway Department to delay installation for construction purposes.

If no pipe is needed, as determined ONLY by the Highway Department, there would be no charge for access. Clinton County Highway Dept. also reserves the right to determine if chosen location of driveway/field entrance is acceptable and in a safe location.

Please mark (With Flag /Stakes) the location of drive so need for the culvert can be determined.
